

GQ3.3 Turn & Move Ruler from www.g-design.us/ships

Above is .5cm = 100 yards when printed at 100% of size; when printing be sure to print actual size.

The Torpedo Gyro Angles are to be glued to the back & top of the Rulers.

For 1 cm = 100 yards, print @200% of size and on larger paper like 13x19" because height is nearly 17.6". Or "tile" to print 2 Rulers on 2 letter-sized pages and paste together (or hinge on cardboard).
