

Originally I designed these labels for 1/4" dowels & by cutting the boxes off you could make a pair of 18,000 yard range sticks that work from either direction (the revers of 3,000 yds being 36,000 yds.

But my latest idea is to attach the labels to a carpenters ruler* and so I added the light cut lines here >

*If you buy a 6 yard such ruler it will barely go to 36,000 yards in the 200 yard/cm scale or a 2-meter ruler goes to 40,000 yards which is long than you need.
